EMIRATES BUILDING SYSTEMS CO. LLC

HSE POLICY

Emirates Building Systems Co. LLC ("EBS" hereafter) specializes in the design, manufacturing, supply of high quality pre-engineered metal buildings, other steel structures and associated site erection activities on a national and international scale.

EBS management recognizes that long-term business success depends on the ability to continually improve the quality of products & services while protecting people & the environment from any harm occurring from our activities. Therefore **Occupational Health, Safety and Environment** ("HSE" hereafter) **policy** is critical to our business success because it will provide a framework for setting HSE objectives to help us systematically minimize losses. This will essentially add value for all our stakeholders. Hence, **EBS management within the defined scope of HSE Management System; the purpose & context of the organization; and the nature & scale of our business, is committed to:**

- Provide safe and healthy working conditions for the prevention of all incidents, injuries, occupational illnesses and other adverse impacts to its employees, contractors and members of the public.
- Provide full support for the prevention of pollution and for the protection of the environment including conservation of the natural resources and effective waste management including scrap and hazardous waste disposal.
- Fulfil its compliance obligations that includes applicable HSE laws /regulations & other applicable requirements.
- Maintain a program of continual improvement of HSE management system and HSE performance.

This HSE policy is applicable to all of the operations and premises controlled or occupied by EBS. In line with the above commitments, the objectives of the HSE Policy are to:

- Implement and maintain an effective HSE Management System in line with International standards **ISO 14001:2015 & ISO 45001:2018**.
- Carry out plant operations and work practices safely and efficiently in line with recognized safety standards and by adopting safe systems of work.
- Establish methods for Identification of HSE hazards & risks from our activities; and implement suitable control measures to eliminate (first) or minimize (if not practically possible) the impacts of the risks that may affect people, environment & assets.
- Provide the necessary HSE training, information, instruction, tools, safe equipment and technological support to the concerned staff.
- Communicate & consult with all employees, workers, their representatives & other interested parties on HSE matters.
- Promote positive health & safety culture throughout the organization.
- Provide and maintain adequate and suitable health and welfare facilities for all employees.
